Straight Talk Automotive announces the release of their Subaru Legacy OBD 1 diagnostic kit

November 26, 2012 –Straight Talk Automotive today announced the release of their Subaru Legacy OBD I diagnostic kit.

Straight Talk Automotive, an online international business supplying professional mechanics and enthusiasts has released a cost effective diagnostic solution for Subaru Legacy OBD 1 cars. The diagnostic kit is supplied in two versions (parallel and serial port).

“Our new Subaru Legacy OBD 1 diagnostic kit brings affordable factory level diagnostics capability within the reach of everyone. It is a simple easy to use kit that includes the B10 self booting non operating system dependent software program, that accesses the full DataStream from the Subaru Legacy OBD 1 cars” stated JD Durham, Business Development Manger, Straight Talk Automotive.

The Subaru Legacy OBD 1 diagnostic kit is available from the company website <http://straighttalkautomotive.com> and at select authorized distributors. Subaru Legacy OBD 1 diagnostic kit suggested retail starts at only \$22.95 for the parallel port version.

Founded in 2009, Straight Talk Automotive supplies scan tools, automotive diagnostic software, factory service manuals, and OEM tools to professional mechanics and enthusiasts internationally. More information about Straight Talk Automotive can be found at <http://straighttalkautomotive.com>
